Research Experience

2026 – 2028

Undergraduate Researcher, Visual Mental Imagery and Aphantasia

Zhejiang University (*in collaboration with Dr. Jianghao Liu, Paris Brain Institute (ICM)*)

Research question: whether imagery signals in aphantasia fail to be generated, or are generated but fail to reach conscious access — a distinction the existing literature has not resolved. Design and methods: co-designed the study; the protocol combines a near-threshold perceptual detection task with an imagery task, together with electrophysiological and neuromodulation measures of visual-cortical and prefrontal involvement. Role: built the experimental platform at Zhejiang University; responsible for participant recruitment, data collection and quality control.
