|             |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2025 – 2029 | <b>B.Sc. in Psychology (Qiusi Honor's Program)</b><br>Zhejiang University ( <i>Hangzhou, China</i> )<br>Expected June 2029. GPA 3.95/4.3 (Top 2 in Honor's Program). English: IELTS 8.0. Research mentor: Dr. Yuzheng Hu. Courses taken: Research Techniques in Psychology; Language, Mind and Brain; Probability and Mathematical Statistics; Calculus; Linear Algebra; Programming; Ethics and Philosophy of Artificial Intelligence. |
| 2026        | <b>Oxford Prospects Winter Visit</b><br>University of Oxford ( <i>Oxford, United Kingdom</i> )<br>Psychology: Interdisciplinary Frontiers of Behaviour and Mind in the Age of AI (grade A+). Received the Best Presentation Award and the Best Film Award.                                                                                                                                                                              |

## Research Interests & Training

---

**Research Interests:** Mental imagery and aphantasia; consciousness (self-model; absence).

**Lab Rotations:** Conducted rotations in social, clinical, developmental and cognitive neuroscience labs, progressively focusing on cognitive neuroscience as a pathway to investigate consciousness.

**Methodological & Philosophical Training:** National academic conferences and philosophy-of-mind seminars; Consciousness Science Reading Group (Swarma Club); Interdisciplinary Reading Club of Aphantasia (IRCA).

**Research Participation:** Contributed to a study on brain plasticity following spinal-cord-stimulation therapy (Liangzhu Laboratory, Zhejiang University), including stimulus development and fMRI data acquisition.

**Technical Skills:** Basic training in fMRI, EEG, fNIRS and eye-tracking, with more hands-on practice in behavioural experiments and fMRI; Python and C, currently learning MATLAB, SPM and PsychoPy.

## Research Experience

---

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2026 – 2028 | <b>Undergraduate Researcher, Visual Mental Imagery and Aphantasia</b><br>Zhejiang University ( <i>in collaboration with Dr. Jianghao Liu, Paris Brain Institute (ICM)</i> )<br>Research question: whether imagery signals in aphantasia fail to be generated, or are generated but fail to reach conscious access — a distinction the existing literature has not resolved. Design and methods: co-designed the study; the protocol combines a near-threshold perceptual detection task with an imagery task, together with electrophysiological and neuromodulation measures of visual-cortical and prefrontal involvement. Role: built the experimental platform at Zhejiang University; responsible for participant recruitment, data collection and quality control. |
